

## Watery Praise

God who flung the elements of hydrogen and oxygen across the heavens

**We praise you and wonder at your creation**

God who shaped the landscape of the earth from water

**We praise you and wonder at your creation**

God who froze the ice caps and glaciers to glint in the sun

**We praise you and wonder at your creation**

God who washes the earth with torrents of refreshing rain

**We praise you and wonder at your creation**

God who fashioned the microscopic organisms that feed the oceans

**We praise you and wonder at your creation**

God who created fish and amphibians to live in water

**We praise you and wonder at your creation**

God who birthed us through the waters of the womb

**We praise you and wonder at your creation  
for we are beautifully and wonderfully made**
